

Yewande Awe is a seasoned international development professional and Senior Environmental Engineer at the World Bank, based in Washington DC, USA. She works on the preparation and supervision of lending operations and analytical activities at the nexus of environment, sustainable development and poverty reduction, including outdoor and indoor air pollution, environmental health, environmental management, environmental governance, air quality management-climate change mitigation synergies, circular economy approaches and priority-setting.

Yewande's work program to date includes projects in Antigua and Barbuda, Argentina, Bolivia, Bosnia and Herzegovina, Colombia, Dominica, El Salvador, Grenada, Guatemala, Jamaica, Kosovo, Mexico, Nigeria, North Macedonia, Peru, Poland, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, and Yemen.

She has co-authored and co-edited several seminal publications including books, reports and journal articles that address pollution, environmental health, environmental governance and environmental management, and has participated as presenter, organizer and advisor in various international conferences and workshops that address these topics. Yewande led the preparation of the World Bank Group's Environment Strategy, [Toward a Green, Clean and Resilient World for All](#).

She leads and participates in interdisciplinary teams and works effectively in strategic partnerships across different stakeholder groups. She also serves as a Respectful Workplace Advisor at the World Bank.

Yewande holds PhD and MSc degrees in Environmental Engineering from Imperial College London, and a BSc in Civil Engineering from University of Lagos.
